EXPECTATIONS AND FEATURES OF THE DESIRED JOB

ECONOMIC SECTOR: **1.** computer science, data processing and acquisition / **2.** communication and telecommunications

CAREER FIELD: **1.** Engineering and design / **2.** Information systems, EDP

DESIRED JOB: **Software Engineer**

PREFERRED DISTRICT TO WORK IN: **1. NAPOLI** / **2. MILANO**

AVAILABILITY FOR BUSINESS TRAVELS: **Yes, even frequently**

AVAILABILITY TO RELOCATE ABROAD: **Yes, even in non-European countries**

WORK EXPERIENCES

IT application developer
IBM ITALIA
Computer science, data processing and acquisition
NAPOLI (NA)
01/2025 - present

Main activities and responsibilities: Active participation in an IBM Maximo-based project, with the following main activities:
- Provided Application Management Services (AMS) support, resolving diverse support tickets related to malfunctions, user/role administration, corrective maintenance, and development of new features.
- Designed and developed custom reports using BIRT (Business Intelligence and Reporting Tools) to extract and visualize key system data.
- Executed functional testing for new features, verifying the correct operation of ticket and work order workflows, notifications (email and push), and user access controls.
- Authored and maintained user manuals, creating clear, step-by-step guides to improve user experience and simplify system use.
Employed as: apprentice - practicum | Company sector: Engineering and design

IT Cloud Fullstack Developer
IBM ITALIA
Computer science, data processing and acquisition
NAPOLI (NA)
09/2024 – 12/2024

Main activities and responsibilities: Consolidation of skills in Cloud FullStack development, with focus on technologies such as Java (Maven, JDBC), SQL, web development (HTML, CSS, JS, Bootstrap) and relational databases.
Active participation in an IBM Maximo-based project, with the following main activities:
- Development and maintenance of the IBM Maximo management system, including scripting in Javascript, Python and Jython.
- Analysis of Java classes and development of SQL queries.
- Implementation and debugging of workflow processes.
- Drafting of User Acceptance Test (UAT), test cases and user manuals.
Employed as: intern/trainee - internship | Company sector: Engineering and design
